CONTENTS OF VOLUME 25

Articles and Special Invited Papers

AHN, HYUNGSOK. Semimartingale integral representation 997–1010

ALDOUS, DAVID. Brownian excursions, critical random graphs and the multiplicative coalescent 812–854

ALEXANDER, KENNETH S. Approximation of subadditive functions and convergence rates in limiting-shape results 30–55

AROUS, G. BEN AND GUIONNET, A. Symmetric Langevin spin glass dynamics 1367–1422

BABILLOT, MARTINE, BOUGEROL, PHILIPPE AND ELIE, LAURE. The random difference equation $X_n = A_n X_n - 1 + B_n$ in the critical case 478–493

BAI, Z. D. Circular law 494–529

BÉLISLE, CLAUDE, MASSE, JEAN-CLAUDE AND RANSFORD, THOMAS. When is a probability measure determined by infinitely many projections? 767–786

BENAÏM, MICHEL. Vertex-reinforced random walks and a conjecture of Pemantle 361–392

BIGGINS, J. D. AND KYPRIANOU, A. E. Seneta–Heyde norming in the branching random walk 337–360

BOBKOV, S. G. An isoperimetric inequality on the discrete cube, and an elementary proof of the isoperimetric inequality in Gauss space 206–214

BOBKOV, S. G. AND HOUDRÉ, C. Isoperimetric constants for product probability measures 184–205

BOLTHAUSEN, ERWIN AND DEN HOLLANDER, FRANK. Localization transition for a polymer near an interface 1334–1366

BOLTHAUSEN, ERWIN AND SCHMOCK, UWE. On self-attracting d-dimensional random walks 531–572

BOUGEROL, PHILIPPE, ELIE, LAURE AND BABILLOT, MARTINE. The random difference equation $X_n = A_n X_n - 1 + B_n$ in the critical case 478–493

BRAMSON, MAURY, COX, J. T. AND GREVEN, ANDREAS. Invariant measures of critical spatial branching processes in high dimensions 56–70

BUNGE, JOHN. Nested classes of C-decomposable laws 215–229

CARMONA, PHILIPPE. The mean velocity of a Brownian motion in a random Lévy potential 1774–1788

CHANG, JOSEPH T. AND PERES, YUVAL. Ladder heights, Gaussian random walks and the Riemann zeta function 787–802

CHEN, ZHEN-QING, DURRETT, RICHARD AND MA, GANG. Holomorphic diffusions and boundary behavior of harmonic functions 1103–1134

CHOI, K. P. AND KLASS, MICHAEL J. Some best possible prophet inequalities for convex functions of sums of independent variates and unordered martingale difference sequences ... 803–811

COX, J. T., GREVEN, ANDREAS AND BRAMSON, MAURY. Invariant measures of critical spatial branching processes in high dimensions 56–70
DARLING, R. W. R. AND PARDOUX, ETIENNE. Backwards SDE with random terminal time and applications to semilinear elliptic PDE 1135–1159
DE ACOSTA, A. Moderate deviations for empirical measures of Markov chains: Lower bounds 259–284
DEHEUVELS, PAUL. Strong laws for local quantile processes ... 2007–2054
DE LA PEÑA, VICTOR H. AND LAI, TZE LEUNG. Moments of randomly stopped U-statistics 2055–2081
DEMBO, AMIR. Information inequalities and concentration of measure 927–939
DEN HOLLANDER, F., KONIG, W. AND VAN DER HOFSTAD, R. Central limit theorem for the Edwards model 573–597
DEN HOLLANDER, FRANK AND BOLTHAUSEN, ERWIN. Localization transition for a polymer near an interface 1334–1366
DONATI-MARTIN, C. AND YOR, M. Some Brownian functionals and their laws 1011–1058
DURRETT, RICHARD, MA, GANG AND CHEN, ZHEN-QING. Holomorphic diffusions and boundary behavior of harmonic functions 1103–1134
DYNKIN, E. B. AND KUZNETSOV, S. E. Natural linear additive functionals of superprocesses 640–661
DYNKIN, E. B. AND KUZNETSOV, S. E. Nonlinear parabolic P.D.E. and additive functionals of superdiffusions 662–701
ELIE, LAURE, BABILLOT, MARTINE AND BOUGEROL, PHILIPPE. The random difference equation $X_n = A_n X_n - 1 + B_n$ in the critical case 478–493
EL KAROUI, N., KAPOUDJIAN, C., PARDOUX, E., PENG, S. AND QUENEZ, M. C. Reflected solutions of backward SDE's, and related obstacle problems for PDE's 702–737
FANNJIANG, ALBERT AND KOMOROWSKI, TOMASZ. A martingale approach to homogenization of unbounded random flows ... 1872–1894
FERNÁNDEZ, R. AND PFISTER, C.-E. Global specifications and nonquasilocality of projections of Gibbs measures 1284–1315
FITZSIMMONS, P. J. Absolute continuity of symmetric diffusions 230–258
FLEMING, WENDELL H. AND SHEU, SHUENN-JYI. Asymptotics for the principal eigenvalue and eigenfunction of a nearly first-order operator with large potential 1953–1994
FÖLLMER, HANS AND GANTERT, NINA. Entropy minimization and Schrödinger processes in infinite dimensions 901–926

GANTERT, NINA AND FÖLLMER, HANS. Entropy minimization and Schrödinger processes in infinite dimensions 901–926
GINÉ, EVARIST, GÖTZE, FRIEDRICH AND MASON, DAVID M. When is the Student t-statistic asymptotically standard normal? ... 1514–1531
GNEDIN, ALEXANDER V. The representation of composition structures 1437–1450
GÖTZE, FRIEDRICH, MASON, DAVID M. AND GINÉ, EVARIST. When is the Student t-statistic asymptotically standard normal? ... 1514–1531
GRAHAM, CARL AND MÉLÉARD, SYLVIE. Stochastic particle approximations for generalized Boltzmann models and convergence estimates 115–132
GRAMA, I. G. On moderate deviations for martingales 152–183
GREVEN, ANDREAS, BRAMSON, MAURY AND COX, J. T. Invariant measures of critical spatial branching processes in high dimensions 56–70
GUIONNET, A. AND AROUS, G. BEN. Symmetric Langevin spin glass dynamics 1367–1422
HÄGGSTRÖM, OLLE. Infinite clusters in dependent automorphism invariant percolation on trees 1423–1436
HAHN, MARJORIE G. AND KLASS, MICHAEL J. Approximation of partial sums of arbitrary I.I.D. random variables and the precision of the usual exponential upper bound 1451–1470
HAMANA, YUJI. The fluctuation result for the multiple point range of two dimensional recurrent random walks 598–639
HAMBLY, B. M. Brownian motion on a random recursive Sierpinski gasket 1059–1102
HENNION, H. Limit theorems for products of positive random matrices 1545–1587
HO, HWAI-CHUNG AND HSING, TAILEN. Limit theorems for functionals of moving averages 1636–1669
HOUDRÉ, C. AND BOBKOV, S. G. Isoperimetric constants for product probability measures 184–205
HSING, TAILEN AND HO, HWAI-CHUNG. Limit theorems for functionals of moving averages 1636–1669
KAPOUDJIAN, C., PARDOUX, E., PENG, S., QUENEZ, M. C. AND EL KAROUI, N. Reflected solutions of backward SDE's, and related obstacle problems for PDE's 702–737
KESTEN, HARRY. A universal form of the Chung-type law of the iterated logarithm 1588–1620
KLASS, MICHAEL J. AND CHOI, K. P. Some best possible prophet inequalities for convex functions of sums of independent variates and unordered martingale difference sequences 803–811

KLASS, MICHAEL J. AND HAHN, MARJORIE G. Approximation of partial sums of arbitrary I.I.D. random variables and the precision of the usual exponential upper bound 1451–1470
KLASS, MICHAEL J. AND NOWICKI, KRZYSZTOF. Order of magnitude bounds for expectations of Δ_2-functions of nonnegative random bilinear forms and generalized U-statistics 1471–1501
KLENKE, ACHIM. Multiple scale analysis of clusters in spatial branching models 1670–1711
KOMOROWSKI, TOMASZ AND FANNJIANG, ALBERT. A martingale approach to homogenization of unbounded random flows ... 1872–1894
KONIG, W., VAN DER HOFSTAD, R. AND DEN HOLLANDER, F. Central limit theorem for the Edwards model 573–597
KRYLOV, N. V. On SPDE's and superdiffusions 1789–1809
KUZNETSOV, S. E. AND DYNKIN, E. B. Natural linear additive functionals of superprocesses 640–661
KUZNETSOV, S. E. AND DYNKIN, E. B. Nonlinear parabolic P.D.E. and additive functionals of superdiffusions 662–701
KYPRIANOU, A. E. AND BIGGINS, J. D. Seneta–Heyde norming in the branching random walk 337–360
LACHAL, AIMÉ. Local asymptotic classes for the successive primitives of Brownian motion 1712–1734
LAI, TZE LEUNG AND DE LA PEÑA, VICTOR H. Moments of randomly stopped U-statistics 2055–2081
LATAŁA, RAFAŁ. Estimation of moments of sums of independent real random variables 1502–1513
LEURIDAN, CHRISTOPHE. Le point d'un fermé le plus visité par le mouvement brownien 953–996
LIAO, MING. Liapounov exponents of stochastic flows 1241–1256
LIFSHITS, M. A. On the lower tail probabilities of some random series 424–442
LIGGETT, T. M., SCHONMANN, R. H. AND STACEY, A. M. Domination by product measures 71–95
LIGGETT, THOMAS M. Stochastic models of interacting systems 1–29
LLOYD, PETER AND SUDBURY, AIDAN. Quantum operators in classical probability theory: IV. Quasi-duality and thinnings of interacting particle systems 96–114
MA, GANG, CHEN, ZHEN-QING AND DURRETT, RICHARD. Holomorphic diffusions and boundary behavior of harmonic functions 1103–1134
MASON, DAVID M., GINÉ, EVARIST AND GÖTZE, FRIEDRICH. When is the Student t-statistic asymptotically standard normal? ... 1514–1531
MASSE, JEAN-CLAUDE, RANSFORD, THOMAS AND BÉLISLE, CLAUDE. When is a probability measure determined by infinitely many projections? 767–786

MÉLÉARD, SYLVIE AND GRAHAM, CARL. Stochastic particle approximations for generalized Boltzmann models and convergence estimates 115–132
MOHAMMED, SALAH-ELDIN A. AND SCHEUTZOW, MICHAEL K. R. Lyapunov exponents of linear stochastic functional differential equations. Part II. Examples and case studies 1210–1240
MUELLER, CARL. Long time existence for the wave equation with a noise term 133–151
NEWMAN, CHARLES M. AND WU, C. CHRIS. Percolation and contact processes with low-dimensional inhomogeneity 1832–1845
NOWICKI, KRZYSZTOF AND KLASS, MICHAEL J. Order of magnitude bounds for expectations of Δ_2-functions of nonnegative random bilinear forms and generalized U-statistics 1471–1501
PARDOUX, E., PENG, S., QUENEZ, M. C., EL KAROUI, N. AND KAPOUDJIAN, C. Reflected solutions of backward SDE's, and related obstacle problems for PDE's 702–737
PARDOUX, ETIENNE AND DARLING, R. W. R. Backwards SDE with random terminal time and applications to semilinear elliptic PDE 1135–1159
PELIGRAD, MAGDA AND UTEV, SERGEY. Central limit theorem for linear processes 443–456
PENG, S., QUENEZ, M. C., EL KAROUI, N., KAPOUDJIAN, C. AND PARDOUX, E. Reflected solutions of backward SDE's, and related obstacle problems for PDE's 702–737
PERES, YUVAL AND CHANG, JOSEPH T. Ladder heights, Gaussian random walks and the Riemann zeta function 787–802
PFISTER, C.-E. AND FERNÁNDEZ, R. Global specifications and nonquasilocality of projections of Gibbs measures 1284–1315
PITMAN, JIM AND YOR, MARC. The two-parameter Poisson–Dirichlet distribution derived from a stable subordinator .. 855–900
POVEL, TOBIAS. Critical large deviations of one-dimensional annealed Brownian motion in a Poissonian potential 1735–1773
PROTTER, PHILIP AND TALAY, DENIS. The Euler scheme for Lévy driven stochastic differential equations 393–423
QUENEZ, M. C., EL KAROUI, N., KAPOUDJIAN, C., PARDOUX, E. AND PENG, S. Reflected solutions of backward SDE's, and related obstacle problems for PDE's 702–737
RANSFORD, THOMAS, BÉLISLE, CLAUDE AND MASSE, JEAN-CLAUDE. When is a probability measure determined by infinitely many projections? 767–786
RAYNAUD DE FITTE, PAUL. Théorème ergodique ponctuel et lois fortes des grands nombres pour des points aléatoires d'un espace metrique à courbure négative 738–766
RHEINLÄNDER, THORSTEN AND SCHWEIZER, MARTIN. On L^2-projections on a space of stochastic integrals 1810–1831

ROTA, GIAN-CARLO AND WALLSTROM, TIMOTHY C. Stochastic integrals: A combinatorial approach 1257–1283
SALZANO, MARCIA AND SCHONMANN, ROBERTO H. The second lowest extremal invariant measure of the contact process 1846–1871
SCHEUTZOW, MICHAEL K. R. AND MOHAMMED, SALAH-ELDIN A. Lyapunov exponents of linear stochastic functional differential equations. Part II. Examples and case studies 1210–1240
SCHIED, ALEXANDER. Geometric aspects of Fleming–Viot and Dawson–Watanabe processes 1160–1179
SCHMOCK, UWE AND BOLTHAUSEN, ERWIN. On self-attracting d-dimensional random walks 531–572
SCHONMANN, R. H., STACEY, A. M. AND LIGGETT, T. M. Domination by product measures 71–95
SCHONMANN, ROBERTO H. AND SALZANO, MARCIA. The second lowest extremal invariant measure of the contact process 1846–1871
SCHWEIZER, MARTIN AND RHEINLÄNDER, THORSTEN. On L^2-projections on a space of stochastic integrals 1810–1831
SHAO, QI-MAN. Self-normalized large deviations 285–328
SHEU, SHUENN-JYI AND FLEMING, WENDELL H. Asymptotics for the principal eigenvalue and eigenfunction of a nearly first-order operator with large potential 1953–1994
SHIELDS, PAUL C. String matching bounds via coding 329–336
STACEY, A. M., LIGGETT, T. M. AND SCHONMANN, R. H. Domination by product measures 71–95
SUDBURY, AIDAN AND LLOYD, PETER. Quantum operators in classical probability theory: IV. Quasi-duality and thinnings of interacting particle systems 96–114
SZNITMAN, ALAIN-SOL. Capacity and principal eigenvalues: The method of enlargement of obstacles revisited 1180–1209
TAKANOBU, SATOSHI. On the error estimate of the integral kernel for the Trotter product formula for Schrödinger operators 1895–1952
TAKEDA, MASAYOSHI AND ZHANG, TUSHENG. Asymptotic properties of additive functionals of Brownian motion 940–952
TALAY, DENIS AND PROTTER, PHILIP. The Euler scheme for Lévy driven stochastic differential equations 393–423
UTEV, SERGEY AND PELIGRAD, MAGDA. Central limit theorem for linear processes 443–456
VAN DEN BERG, J. A constructive mixing condition for 2-D Gibbs measures with random interactions 1316–1333
VAN DER HOFSTAD, R., DEN HOLLANDER, F. AND KONIG, W. Central limit theorem for the Edwards model 573–597
VOIT, MICHAEL. Rate of convergence to Gaussian measures on n-spheres and Jacobi hypergroups 457–477

WALLSTROM, TIMOTHY C. AND ROTA, GIAN-CARLO. Stochastic integrals: A combinatorial approach 1257–1283
WANG, FENG-YU. Sharp explicit lower bounds of heat kernels .. 1995–2006
WU, C. CHRIS AND NEWMAN, CHARLES M. Percolation and contact processes with low-dimensional inhomogeneity 1832–1845
YOR, M. AND DONATI-MARTIN, C. Some Brownian functionals and their laws 1011–1058
YOR, MARC AND PITMAN, JIM. The two-parameter Poisson–Dirichlet distribution derived from a stable subordinator .. 855–900
ZHANG, LI-XIN. Strong approximation theorems for geometrically weighted random series and their applications 1621–1635
ZHANG, TUSHENG AND TAKEDA, MASAYOSHI. Asymptotic properties of additive functionals of Brownian motion 940–952

Book Reviews

BASS, RICHARD F. Review of *Positive Harmonic Functions and Diffusion: An Integrated Analytic and Probabilistic Approach* by Ross G. Pinsky 1532–1535
WIHSTUTZ, VOLKER. Review of *Markov Chains and Stochastic Stability* by S. P. Meyn and R. L. Tweedie 1536–1540

Correction

BHATTACHARYA, RABI N. AND LEE, OESOOK. Asymptotics of a class of Markov processes which are not in general irreducible .. 1541–1543
LEE, OESOOK AND BHATTACHARYA, RABI N. Asymptotics of a class of Markov processes which are not in general irreducible .. 1541–1543
